

# Creates safety in everyday life for our seniors

- Do you want to increase safety for a senior?
  - Or do you as a senior feel that everyday life can be associated with unsafe moments?
- = Sensorem's safety alarm creates safety for the senior and their relatives!

## Sequence of events when the alarm button is pressed

- 1 The senior presses the smart watch's alarm button
- 2 Relatives receive alarm notifications with GPS location in the Sensorem app
- 3 Alarm receivers are automatically called up through the watch's speakerphone in a predetermined order (the watch works like a mobile phone and has a built-in SIM card)
- 4 If none of the senior's relatives answer, the call is connected to Sensorem's alarm center (open 24/7). If the situation is urgent, the alarm center connects the call to SOS Alarm, which can send an ambulance.

## Stylish and user-friendly safety alarm

- ✓ The watch works both indoors and outdoors (communicates via the mobile network)
- ✓ The watch's battery lasts ~3 days and is charged with the included charger (the alarm can be used while charging)
- ✓ The watch is waterproof

## Smart features in the app

- ✓ Find my senior (see the users position in real-time)
- ✓ Geofence (warning outside pre-defined area)
- ✓ Event log and warning notices (incl. battery status)

The safety alarm costs SEK 300/month (including loan of the watch)  
No commitment period and the watch is ready for use upon delivery!
